

Heart Disease
IS THE #1 CAUSE OF DEATH
in the United States for both Men and Women

**LEARN HOW 3
MINUTES COULD
SAVE YOUR LIFE**

Based on your medical history and risk factors, your healthcare provider may recommend a simple, non-invasive test to determine your risk for cardiovascular-related disease.

This diagnostic test (plethysmography) is an excellent screening tool that will provide valuable information in regards to early detection.

THE MAX PULSE

THE TEST ANALYZES:

- Overall cardiovascular health
- Heart Rate Variability and Mean Heart Rate
- Overall elasticity (Arterial Stiffness)
- Arteriosclerosis progress
- Blood circulation and remaining blood in the vessels after the systolic contraction of the heart
- Left ventricular ejection, contraction power
- Mental Stress, Physical Stress and Stress Resistance
